

CALNET II RFP DGS-2053
Question and Answer Set #19
January 12, 2006

89. Will Internet Services be allowed on the contract?

Internet Services may be proposed in the unsolicited features section for consideration and possible inclusion in the contract.

90. In Section 6.2.23.2.1, 6.2.23.2.4,5, and 6.2.23.2.11, there is a reference to a TMRC in the remedies. Since these products are usage based, what does the State mean by the TMRC?

The TMRC (Total Monthly Recurring Cost) applies to the equation only if the customer is being charged a monthly recurring charge. If a service has no monthly recurring charge, then only the Average Monthly Usage Cost (AMUC) would apply to the equation when a rebate is owed.

91. Since the delivery of the Technical Proposal may entail delivery of a substantial number of binders, how and where would the State like us to deliver up to 15-20 boxes of binders/information?

As stated in Section 1, all submittals are to be delivered to the Department of General Services, Procurement Division, 2nd Floor, 707 Third St. West Sacramento, CA.

92. Is the State looking for a P.01 or a P.03 grade of service for both the Hosted and Converged Platform for Module 3?

P.01 is required for the Hosted Standalone IP Telephony Service. P.03 is required for the Converged Services, IP Telephony Service.
